An International Journal

computers & operations research

and Their Application to Problems of World Concern

editor

Samuel J. Raff: 8312 Snug Hill Lane, Potomac, MD 20854, U.S.A.

editorial advisory board

Vijay Aggarwal
Management Development
Institute of India

G. Anandalingam
University of Pennsylvania

Donald Aucamp
Southern Illinois University

Larry M. Austin
Texas Tech University

Jonathan F. Bard
University of Texas at Austin

Oded Berman
University of Massachusetts

Lucio Bianco
University of Rome
"Tor Vergata"

Lawrence Bodin
University of Maryland

Israel Borovits
Tel Aviv University

R. L. Bulfin
Auburn University

Wilfred Candler
World Bank

M. L. Chaudhry
Royal Military College of
Canada

T. C. E. Cheng
University of Manitoba,
Canada

James A. Chisman
Clemson University

Eng Ung Choo
Simon Fraser University,
Canada

Brian Conolly
Cambridge, England

Richard F. Deckro
Portland State University

John Dinkel
Texas A&M University

H. A. Eiselt
University of New Brunswick

E. A. Elsayed
Rutgers University

James R. Evans
University of Cincinnati

James O. Frendewey
Michigan Technological
University

Moshe Friedman
University of Miami

Saul Gass
University of Maryland

Bezalel Gavish
Vanderbilt University

Parviz Ghandforoush
Virginia Polytechnic Institute
& State University

Bruce Golden
University of Maryland

Donald Gross
George Washington University

Jatinder N. D. Gupta
Ball State University

Michael Hanna
University of Houston—
Clear Lake

Edward L. Hannan
SUNY at Albany

Michael Harnett
Kansas State University

John Honig
Bethesda, Md

James P. Ignizio
University of Houston

Jacob Intrator
Bar-Ilan University, Israel

James P. Jarvis
Clemson University

Mark H. Karwan
SUNY at Buffalo

Inder Khosla
University of Minnesota

R. Patrick Koelling
Virginia Polytechnic Institute
& State University

N. K. Kwak
St Louis University

Lawrence LaForge
Clemson University

Santi Lahiri
Winchester, Mass.

Judah Lando
ELSCINT Ltd, Israel

Gilbert Laporte
Université de Montréal

Richard Larson
Massachusetts Institute of
Technology

Cecil E. Law

Milan Zeleny
Fordham University

Publishing Office

Pergamon Press plc, Pergamon House, Bampfylde Street, Exeter EX1 2AH, England [Tel. Exeter (0392) 51558; Fax 425370].

Subscription and Advertising Offices

North America: Pergamon Press Inc., 395 Saw Mill River Road, Elmsford, NY 10523, U.S.A.; Rest of the World: Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England [Tel. Oxford (0865) 794141].

Publication Frequency: 8 issues/annum. Copyright © 1991 Pergamon Press plc

Subscription Rates

Annual institutional subscription rate (1992): £330.00 (US\$530.00). Two-year institutional rate (1992/93): £627.00 (US\$1007.00). Sterling prices are definitive. US\$ prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Subscription rates for Japan are available on request.

Back Issues

Back issues of all previously published volumes, in both hard copy and on microform are available direct from Pergamon Press offices.

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature, and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Whilst every effort is made by the publishers and editorial board to see that no inaccurate or misleading data, opinion or statement appears in this journal, they wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the sole responsibility of the contributor or advertiser concerned. Accordingly, the publishers, the editorial board and editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

Photocopying Information for Users in the U.S.A. The Item-fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law is paid. The appropriate remittance of \$3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970, U.S.A.

Permission for other use. The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for copying. The Item-fee Code for this publication is 0305-0548/91 \$3.00 + 0.00

List of Contents

NUMBER 1

Rajendra Solanki	1	Generating the noninferior set in mixed integer biobjective linear programs: an application to a location problem
Hermínio Simões Gomes and José Mario Martínez	17	A numerically stable reduced-gradient type algorithm for solving large-scale linearly constrained minimization problems
David Whitaker and Susan M. Brown	33	Linear programme modelling with databases
Douglas J. White	43	The maximal dispersion problem and the "first point outside the neighbourhood" heuristic
Ho Woo Lee and Soon Seok Lee	51	A batch arrival queue with different vacations
Manlio Gaudioso and Pasquale Legato	59	Linear programming models for load balancing
Saul I. Gass	65	Military manpower planning models
Lawrence Bodin and Azita Kashani	75	The zone hopping problem
Cliff T. Ragsdale and Patrick G. McKeown	87	An algorithm for solving fixed-charge problems using surrogate constraints
Wan S. Shin and A. Ravindran	97	Interactive multiple objective optimization: Survey I—continuous case
Tzvi Raz and Dennis Bricker	115	Optimal and heuristic solutions to the variable inspection policy problem
<i>Note</i> Bernard Dickman, Yonah Wilamowsky and Sheldon Epstein	125	Optimal common due-date with limited completion time
Conference Announcement	I	

NUMBER 2

Noel Bryson	129	Parametric programming and Lagrangian relaxation: the case of the network problem with a single side-constraint
Daoud Ait Kadi and Robert Clérout	141	Replacement strategies with mixed corrective actions at failure

R. Ramesh and Kathleen M. Brown	151	An efficient four-phase heuristic for the generalized orienteering problem
Choong Y. Lee	167	An optimal algorithm for the multiproduct capacitated facility location problem with a choice of facility type
Saligrama R. Agnihothri	183	Complementarity between the finite capacity and finite source queuing systems
Wen Lea Pearn	189	Augment-Insert algorithms for the capacitated arc routing problem
Robert R. Trippi and Efraim Turban	199	Parallel processing and OR/MS
Laura Ignizio Burke	211	Introduction to artificial neural systems for pattern recognition
Jati K. Sengupta	221	Robust decisions in economic models
Eero Kasanen, Ralf Östermark and Milan Zeleny	233	Gestalt system of holistic graphics: new management support view of MCDM

NUMBER 3

Bharat K. Kaku, Gerald L. Thompson and Thomas E. Morton	241	A hybrid heuristic for the facilities layout problem
J. K. Suryanarayanan, B. L. Golden and Q. Wang	255	A new heuristic for the linear placement problem
M. Desrochers and T. W. Verhoog	263	A new heuristic for the fleet size and mix vehicle routing problem
Christopher L. Huntley and Donald E. Brown	275	A parallel heuristic for quadratic assignment problems
Lee Josvanger Crowder and V. A. Sposito	291	Sequential linear goal programming: implementation via MPSX/370E
Muhammad El-Taha and John R. Heath	297	A model of channel allocation in multichannel local networks
Cesar G. Tapia and Bruce A. Murtagh	307	Interactive fuzzy programming with preference criteria in multiobjective decision-making
Bahram Alidaee	317	Single machine scheduling with nonlinear cost functions

A. M. A. Hariri and C. N. Potts	323	Heuristics for scheduling unrelated parallel machines
Corrigendum	333	

NUMBER 4

Margaret F. Shipley, Andre de Korvin and Riad Obid	335	A decision making model for multi-attribute problems incorporating uncertainty and bias measures
Don Hommertzheim, John Huffman and Ihsan Sabuncuoglu	343	Training an artificial neural network the pure pursuit maneuver
Patrice Marcotte and Gilles Savard	355	A note on the Pareto optimality of solutions to the linear bilevel programming problem
Yves De Serres	361	Simultaneous optimization of flow-control and scheduling in a single server queue with two job classes: numerical results and approximation
Chung-Yee Lee, Surya Liman Danusaputro and Chen-Sin Lin	379	Minimizing weighted number of tardy jobs and weighted earliness-tardiness penalties about a common due date
Marvin D. Troutt and Suresh K. Tadisina	391	A mixed integer programming approach for accommodating outliers with the minimax absolute error criterion

NUMBER 5

Abraham Mehrez, Buddy L. Myers and Moutaz J. Khouja	397	Quality and inventory issues within the newsboy problem
C. N. Potts	411	Scheduling two job classes on a single machine
Avishai Ceder	417	A procedure to adjust transit trip departure times through minimizing the maximum headway
Michael B. Silberholz, Bruce L. Golden and Edward K. Baker	433	Using simulation to study the impact of work rules on productivity at marine container terminals
In-Soo Lee	453	A note on a deterministic production scheduling model
Prabuddha De, Jay B. Ghosh and Charles E. Wells	457	On the minimization of the weighted number of tardy jobs with random processing times and deadline

Prabuddha De, Jay B. Ghosh and Charles E. Wells	465	Scheduling to minimize weighted earliness and tardiness about a common due-date
Kun-Jen Chung and Matthew J. Sobel	477	Linear programming solutions of the truncated moment problem
Diptendu Sinha	487	Optimal policy estimation for continuous review inventory systems
Announcements	I	

NUMBER 6

Ayoade Kuye	497	Numerical experiments with the one-dimensional non-linear simplex search
Abid M. Elabdalla	507	A note on multikey sorting using modified binary insertion trees
Amiya K. Chakravarty and G. E. Martin	515	Operational economies of a process positioning determinant
Moshe B. Rosenwein	531	An improved bounding procedure for the constrained assignment problem
Kah Mun Cheh, Jeffrey B. Goldberg and Ronald G. Askin	537	A note on the effect of neighborhood structure in simulated annealing
Parthasarati Dileepan and Tapan Sen	549	Job lateness in a two-machine flowshop with setup times separated
Deb Ghosh and Ishwar Murthy	557	A solution procedure for the file allocation problem with file availability and response time
Robert T. Barrett and R. Lawrence LaForge	569	A study of replanning frequencies in a material requirements planning system
J. B. Rosen, S.-Z. Sun and G.-L. Xue	579	Algorithms for the quickest path problem and the enumeration of quickest paths
Announcements	I	

NUMBER 7

OPERATIONS RESEARCH AND THE RUDE INTRUSIONS OF THE REAL WORLD

Samuel J. Raff	v	Preface
James A. Chisman	585	Preparing students and new practitioners for the real-world of OR/MS

Wilfred Candler	591	Coal blending—with acceptance sampling
Hamdy A. Taha	597	Operations research analysis of a stock market problem
Douglas A. Samuelson	603	On the hazards of relying on mathematical models: three cases from Federal policy analysis
Robert E. D. Woolsey	607	Being wrong with Clarke & Wright
Samuel J. Raff	611	The Navy passive ranging problem
Salah E. Elmaghraby	615	Manufacturing capacity and its measurement: a critical evaluation
Saul I. Gass	629	OR in the real world: how things go wrong
Fran Samuelson	633	An intelligent spouse's view of OR
Announcements	I	

NUMBER 8

Thomas A. Feo, Krishnamurthi Venkatraman and Jonathan F. Bard	635	A GRASP® for a difficult single machine scheduling problem
J. J. Júdice and A. M. Faustino	645	A computational analysis of LCP methods for bilinear and concave quadratic programming
Tom M. Cavalier and Brian J. Melloy	655	An iterative linear programming solution to the Euclidean regression model
R. K-Y. Li and R. J. Willis	663	Alternative resources in project scheduling
Marc J. Schniederjans, N. K. Kwak and James S. Frueh	669	A stochastic linear programming model to improve automobile dealership operations
M. L. Chaudhry, U. C. Gupta and Manju Agarwal	679	On exact computational analysis of distributions of numbers in systems for $M/G/1/N+1$ and $GI/M/1/N+1$ queues using roots
Yasushi Masuda and Ushio Sumita	695	Numerical analysis of gracefully degrading fault-tolerant computer systems: semi-Markov and Laguerre transform approach
Leo W. G. Strijbosch, Arno G. M. Van Doorne and Willem J. Selen	709	A simplified MOLP algorithm: the MOLP-S procedure
Prabuddha De, Jay B. Ghosh and Charles E. Wells	717	Some clarifications on the bicriteria scheduling of unit execution time jobs on a single machine

Alireza Ardalan	721	Combined optimal price and optimal inventory replenishment policies when a sale results in increase in demand
Michael M. Kostreva and Karen S. B. Jennings	731	Nurse scheduling on a microcomputer
K. Nurmi	741	Travelling salesman problem tools for microcomputers
P. Constantopoulos, F. C. Schweppe and R. C. Larson	751	ESTIA: a real-time consumer control scheme for space conditioning usage under spot electricity pricing
Jean-François Mondou, Teodor Gabriel Crainic and Sang Nguyen	767	Shortest path algorithms: a computational study with the C programming language
B. V. Cadambi	787	One machine scheduling to minimize expected mean tardiness—Part I
Announcements	I
